Verdies - *Tales from the Lakeside*

This beautiful saga is centred around the ecosystem of a lake. The Verdies are small green-skinned defenders of the Sea of Reeds. They fly around on warblers protecting all living creatures of the Babbly Lake. Their favourite pastime is the Bullfrog Rodeo where the champions of Verdes and Frogs compete. Their main enemies are the red skinned Grimps and their allies, the swans and rats of the neighbouring lake.

All this are the ingredients of the tales of all living creatures in and around the Sea of Reeds.

Children's knowledge of Spring, Summer, Autumn and Winter is deepened through the adventures of the characters, while they are actively involved in all kind of the events.

Verdies - *Tales from the Lakeside*

Let us introduce....

The Verdies are the small, almost invisible guardians of the Lakeside. The body of a grown-up Verdy is hardly bigger than the flower of a dandelion, and their skin is green, like the reeds themselves. When they are young, their hair is green, and they are only allowed to join the ranks of the guards when their hair has begun to turn brown.

How brave they are....

The Verdies protect the inhabitants of the Lakeside from all enemies. They fly around on warblers and fight the invading swans, greedy water rats and also the little red-skinned Grims who raid the Sea of Reeds, throw away their thrash and refuse to work.

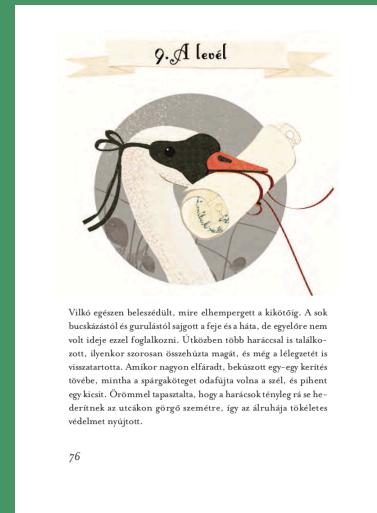

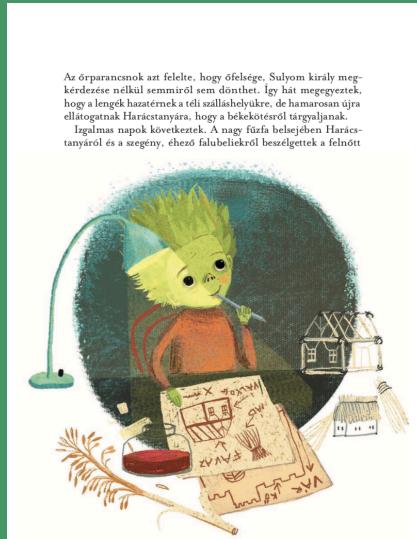

From one adventure to the other.....

Verdies always face difficult situations. The Grims steal the tadpoles from the Frog nursery, they try to kidnap ducklings, or make alliance with the rats and swans in order to occupy Verdie Castle and the Babbly Lake. Verdies always find a way to fight them back. In the meantime, they enjoy Bullfrog Rodeo, host swallows and other birds, build acorn cannons and collect herbs and berries on the shore.

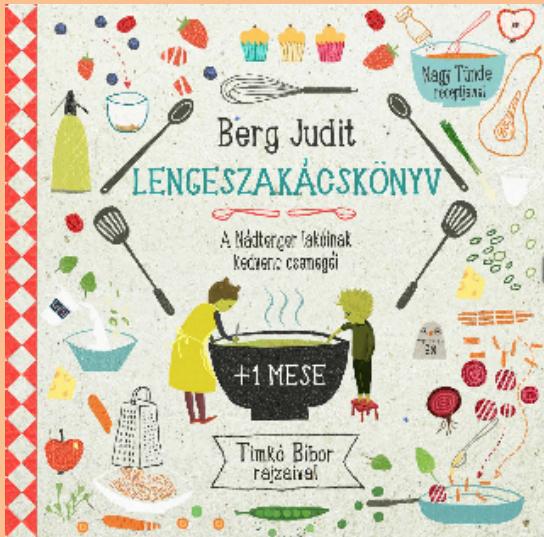

And Willie Whistle.....

Willie is a rascally Verdies boy. He is the most inventive and daring of all the Verdy kids of the Sea of Reeds. However, his hair does not want to turn brown at all. Remaining in kid status while his friends have all become guardians makes life very difficult for Willie. Nevertheless, his secret inventions, like the storm glider and the plastic bottle motorboat make him move as fast as warblers.

Akár májban vidd át a téli, a fagyok elminősít és a melegebb idő érkezését minden nagyon várja a lengék. Hiszen tavaszuk nemcsak a természet két új eletere, de feledések a téli álmotól általában, és visszatérnek a költhető madaraknál is. A Nádterger laka a tavaszi békáncséről szólók megrendező a Lencsefesztivál, amikor friss békáncscsík mindenféle finomságot készítene. Az ifjúknak kedvenc a pattogatott békáncs, melyet a moszehagymás-békáncsleves lágos, de ilyenkor még a szendvicsökkel is békáncsre kremmel kerülnek meg!

Május közepére virágokon bontanak a part menti békababárok. A lengesszakonyok nemcsak szípot készítenek az apák, többekhez virágokból, de palacsintába és más edényekbe is beleleszik. Még napfénnyel tükrözve a másik május végére berések Lile kedvence gyümölcsök, a szamíca. Egyezet, fogadásnak vagy gyöngyöként megeszik ebédük igrát, utána megrépték a hasa, de a fogadtatónk megnyerte, és másnap már újra jöhetnek lakkárczott!

A parton nyíló ibolyákat és a közeli hirsufák virágát szártva tezik el, mert ez a két gyöngynövény a legalkalmasabb az osztály meghűségek és köhögések kezelésére. Egy finom, mézes hárfa- vagy ibolyatestdől néhány nap alatt emlélik a lengyelcsempe hurut is!

A lengék ünnepégein elengedhetetlen csemege a pattogatott békáncs, de színes, ízletes és egyszerű receptekkel is készíthetők. A szendvicsökkel való összekeverés a legtöbb színpompás ételben is előfordulhat, hiszen a lengék a szendvicsökkel is kifizetik, hogy az egész talca olyan lehet, mint a topant mész vagy vadrágai. A gyakorlatban a békáncs nemcsak háztartón, hanem ehető is, hogyan kell a magyaltságokra felkészülni, vendégeket várni, és különleges falatokat készíteni.

The Calendar book

The Sea of Reads Calendar explains the characteristics and habits of the lakeside inhabitants (both fictional and real).

While reading the book children are introduced to the annual biocycle of life at the lakeside.

It contains exciting information about animals, plants and also the fictional characters. (Different typography distinguishes fiction and reality)

The Calendar can be used as supplementary material for teaching biology, environment-protection and the characteristics of seasons and months.

A lengék univerzumánban elengedhetetlen csemege a pattogott békálemese, de szerep a ropogó, zöldízűszeres rúdacsikák, az algás belest és a gyümölcsös sütemények is. Tavasszal és nyáron a szendvicselhető alakúak formájában is elérhetők. Az őszi és téli hónapokban a pálinkások készítéséhez használt gyógynövény gyümölcs és befőttes ételei tanítják meg a lengékkel, hanem előfestik azt is, hogyan kell a nagy mulatságra felkészülni, vöröshagymát vinni és különleges falatokat készíteni.
